

Get on the air

Cherry Creek Young Amateur Radio Club

Have you ever wanted to talk over the air waves using Ham Radio? Did you know that using very little power you can talk to people all over the world?

Come out and "GET ON THE AIR" for Field Day 2011. Field Day is an Amateur Radio event where hams from all over take their gear to the 'field' and operate "off the grid". Even though you may not have a radio license you can get on the air and talk too. It's tons of fun so plan on coming by and seeing us operate and take a turn at talking on the air.
